Academic Projects

Title : demo

Platform : demo

Duration : 1 Month

Description : demo

Title : Box transfer Mechanism

Platform : CATIA

Duration : 6 Months

Description : This project aims to fabricate a machine for the intermediate motion of the object by using a crank and rocker mechanism. The objective of our project is to produce a mechanism that delivers this stop-and-move motion using mechanical linkages. the advantage of our system over the conveyor system is that the system has a time delay between moving packages and this delay can be used to introduce any alterations in the packages or move the package for any other purpose and likewise.
